Education

Yıldız Technical University - Istanbul, Turkey

Bachelor of Science in Mechatronics Engineering Expected June 2028 | GPA: 3.65 / 4.00

Eskisehir Technical University - Eskisehir, Turkey

Bachelor of Science in Computer Engineering Lateral transfer at the end of the second year | GPA: 3.63 / 4.00

Project Experience

ASABEES Autonomous Drone Team — TEKNOFEST 2026

Eskisehir, Turkey

Flight Control Software Developer 2026 – Present

- Developing flight-control software and a MAVLink bridge linking a ROS2 autonomy stack and onboard AI inference to a Pixhawk 2 Cube flight controller for GPS-independent autonomous flight.
- Preparing for TEKNOFEST 2026 FPV Drone Tracking, where the drone tracks targets in real time using YOLOv8 + ByteTrack on a Raspberry Pi 5 with a Hailo AI accelerator.

Devreden.com.tr — Second-Hand Marketplace

Eskisehir, Turkey

Founder / Developer 2026

- Independently designed, built, and deployed a live web marketplace for second-hand goods, currently running in production with real users.
- Owned the full product lifecycle from concept to launch, including frontend, backend, and deployment.

OnyxFit AI — Virtual Try-On for Fashion Brands

Eskisehir, Turkey

Founder / Developer 2026

- Built an AI virtual try-on web app (Next.js, TypeScript, diffusion models) that renders any garment onto a model photo in seconds, removing the need for per-item photoshoots.
- Developed an automated lead-generation pipeline (n8n, Claude API, Apify) to identify and qualify Turkish fashion businesses as a go-to-market channel.

ATAP Entrepreneurship Workshop and Competition

Eskisehir, Turkey

Developer May 2026

- Built an AI-powered platform to streamline business certification processes through intelligent automation, presenting a functional prototype and business model to a panel of judges.
- Achieved 3rd place and a ₺20,000 prize in a three-day entrepreneurship event organized by ETGB and ATAP.

The Future of Wallet Hackathon by Tether and Bybit

Istanbul, Turkey

AI Developer November 2025

- Developed a non-custodial crypto wallet with an integrated AI agent using the Tether Wallet Development Kit (WDK), enabling transactions via voice and conversational input.
- Achieved 2nd place among 10 teams, winning a \$2,000 prize for technical innovation and a successful live demonstration.

Stellar Hack Pera Hackathon

Istanbul, Turkey

Team Leader / Developer June 2025

- Prototyped a decentralized crowdfunding platform enabling transparent, milestone-based capital distribution between creators and backers.
- Led team workflows and project milestones in a fast-paced hackathon environment.

Leadership & Activities

ESTU Blockchain Club

Eskisehir, Turkey

Board Member, DevTeam Lead February 2026 – Present

- Serve on the executive board leading the development team, overseeing technical projects, coordinating developer contributions, and running hands-on Web3 workshops.

EESTEC LC Eskisehir

Eskisehir, Turkey

Active Member September 2024 – Present

- Organized major career events and technical workshops with industry professionals, coordinating logistics and resources to maximize student engagement.

Skills & Interests

- Technical: Python, Java, C++, JavaScript, HTML/CSS, React, Next.js, TypeScript, Tailwind CSS, Node.js, PostgreSQL, Git, Stellar SDK, Tether WDK
- Language: Turkish (Native), English (Advanced, YÖKDİL: 71.25/100)
- Interests: Entrepreneurship, Artificial Intelligence Trends, NBA & Basketball
